Guidelines for using Schmoolz >> on climbing walls

1. Schmoolers should identify themselves at reception and should always seek permission before commencing activities.
2. Always ensure you have tied into your harness correctly using a recognised knot before picking up the Schmoolz (we know it's exciting!).
3. Helmets are recommended while climbing with Schmoolz.
4. It is mandatory to use a leash system when rope climbing with the Schmoolz to prevent dropping them onto someone's head.
5. Leashes should not be used when bouldering, therefore Schmooling should only take place on bouldering walls during dedicated or competition sessions or if an area has been taped and cordoned off by the employees of the wall / centre.
6. When belaying using a 'bottom rope' system, it is essential that the belayer initially keeps the rope tight to the climber, as there is a greater tendency while Schmooling for unexpected falls ('pops').
7. When leading, it is mandatory to pre-clip at least two runners in a 'normal' climbing way before returning to the floor for the Schmoolz. This may prevent a ground fall.
8. Always climb showing consideration for other climbers and Schmoolers, especially when on adjacent climbs. Schmoolers should give way to 'normal' climbers.
9. No Dynoing or jumping for holds!
10. Normal Wall / Centre rules apply.
